

No more mental time zone conversion: version dates in the diff viewer and the load script diff editor now show in your own local time, and a hidden horizontal scrollbar in the load script editor is fixed.

#### WHAT'S NEW

---

### Local Timestamps

Version dates in the diff viewer and the load script diff editor now display in your own local time, so reading when a version was taken no longer means converting time zones.

#### FIX

---

- Load script editor: fixed a hidden horizontal scrollbar when the Soterre Helper is enabled.
