# Your Cognos Inventory Dashboard

Powered By MotioCI

The Starting Point of Every Cognos Project

The MotioCI Inventory Dashboard instantly provides you with all the details about your environment needed to begin and manage your next Cognos project successfully. It presents a granular overview of what is important, what is complex, and what is used, allowing you to set the scope of your project and mitigate any project risks.

It's Analytics on Your Analytics

- **U**nderstand your numbers
- Dive into the breakdown of all your reports by their complexity
- Assess the usage of all assets in the scope
- Determine the objects that could cause you trouble

Know Where You Stand

- Access the Risk Index:
  - Take action before you start a project
  - Clean up Cognos
  - Fix issues
  - Limit the scope

Your Cognos Inventory Dashboard

The Users page lets you understand just that - what users are doing:

- Track adoption and efficiency
- See exactly who owns what
- Identify inactive users
- Gauge BI Staff effectiveness at a glance

The Usage page provides a granular view of what Cognos is consuming.

Obtain insights into packages and report executions.

Allowing you to see what to keep and what to delete.
