

ReportCard

Fine-Tuning Cognos Performance Obtain Real-World Load and Stress Testing

ReportCard quickly identifies and resolves Cognos performance issues. It monitors user activity and system behavior, using real-world scenarios to prevent future problems and ensure your system can handle upgrades and cloud migrations.

**Avoid outages:
real-time alerts**

**Insights into
Issues**

**Discern Cognos
performance**

Track activities, identify issues,
and get real-time alerts

Ensure peak performance
during real-world scenarios

Analyze real data for
solutions

Record Cognos activity and
system behavior

Replay to ensure improved
system behavior
