# Persona IQ

Safely allows Cognos teams to smoothly map users from one authentication source to another without re-implementation or loss

A Safe and Seamless Transition for Cognos

Replace Your Namespace

- Virtualize multiple authentication sources into one
- Maintain security IDs within Cognos
- Change sources with no user impact

Migrate Your Namespace

- Move between authentication sources safely, quickly, and easily
- Evade a tedious security process

Save Time

- Downtime less than 5 minutes
- Reconfigure to new security in under an hour
- Automate a manual and error-prone approach
