Providing a Safeguarded Power BI Experience

Soterre prevents organizations from slipping into the Analytic Danger Zone, the gray area of self-service responsibility. BI leaders gain additional development visibility, keeping Power BI reliable and manageable—without disrupting citizen development workflows.
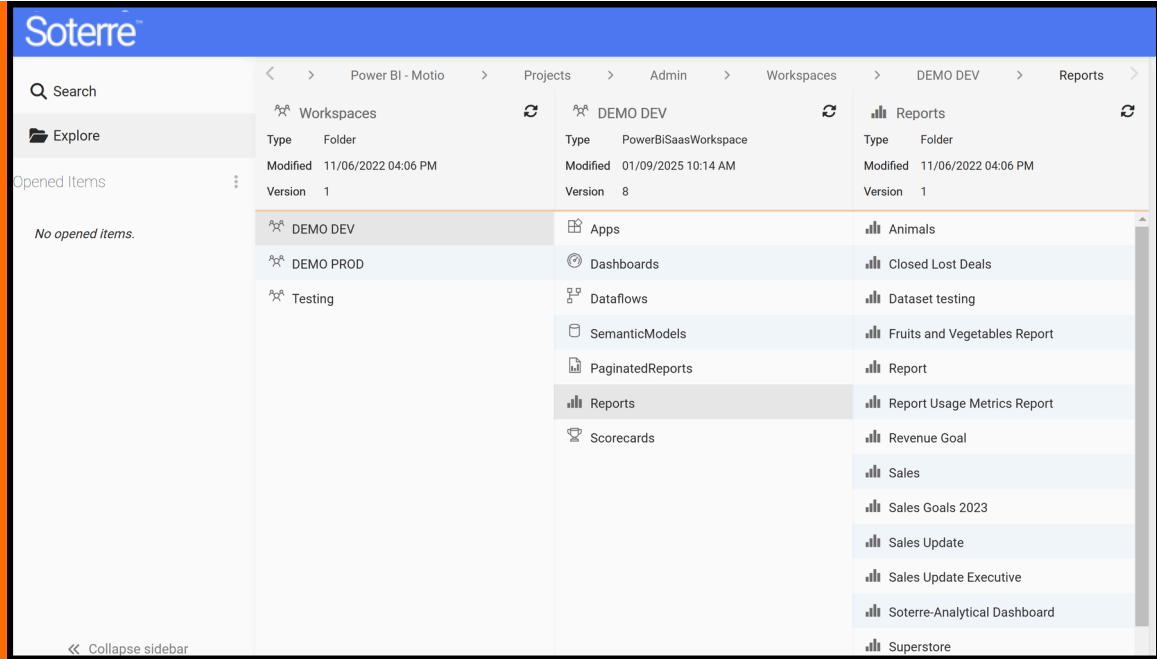

Guard rails for self-service analytics

Reduced errors through automation

Frictionless company compliance

Decreased development timelines

Advancements Beyond Traditional DevOps
- Minimize risk through zero-touch versioning, rollback, and activity tracking.
- Boost productivity through seamless automation workflows.
- Execute versatile deployments with reusable plans and pipelines.

Conjure Up Your Power BI Browser
- Compare Power BI report versions side by side, instantly understanding changes.
- Find DAX inconsistencies through a full metadata catalog.
- Globally search across DAX expressions, table names, and reports.

Steer Clear of The Analytic Danger Zone
- Apply compliance that fits Power BI's self-service model.
- Curb your analytics expansion.
- Create a zero-effort governance zone without power user burden.
