Improve Your Qlik User Adoption

Guided Tour increases business users' understanding of the visualizations in sheets when analyzing the data. Reduce the time you spend on onboarding and increase data literacy by embedding knowledge directly into the app experience.

Reduce Manual Effort:
- Use **AI-powered documentation** to complete metadata by generating measure names and descriptions
- Ease development further with enhanced capabilities, including **Thumbnail Assistance**, **Application Checklist**, and **interactive tooltips**

Enhance User Engagement

Give business users a clear picture of the meaning of the visualizations and its definitions provided regardless of familiarity.

Improved User Onboarding

Shorten the learning curve by guiding new users through the app, so they can get up to speed without needing extra hand-holding.

Provides Community Consistency

Delivers a uniform understanding of charts, KPIs, and objects, so everyone interprets insights the same way.
