DA Sample App Collected on 6/21/2024 11:54:34 AM

| Summary | Flags 246 / 246 | Sheets 50 / 50 | Tables 27 / 27 | Fields 93 / 93 | Variables 34 / 34 | Viz 243 / 2 |
|---|---|---|---|---|---|---|

Unresolved | (0 of 0) Resolved | (0 of 0) Hidden

Quality (44 Unresolved, 0 Resolved, 0 Hidden)

Resource (41 Unresolved, 0 Resolved, 0 Hidden)

Warning  0-row table (1 Unresolved, 0 Resolved, 0 Hidden)

Warning  100% Null field (2 Unresolved, 0 Resolved, 0 Hidden)

Info  All fields unused but keys (4 Unresolved, 0 Resolved, 0 Hidden)

# QSDA Pro for Qlik

www.motio.com

# Understand your Qlik apps before they *slow you down*

Many analytics teams spend more time figuring out existing Qlik apps than moving work forward. Without clear insight into how apps are structured, even simple updates can take longer than they should.

QSDA Pro, created by Qlik expert Rob Wunderlich, brings clarity to that complexity. It helps teams quickly understand their applications, improve efficiency in everday development, and support more structured ways of working. When paired with Soterre, these insights connect directly into the DevOps process across environments.

The result is faster development, clearer reviews, and Qlik environments that scale with consistency and confidence.

## QUALITY STANDARDS

✓ Runs automated analysis across Qlik apps

✓ Applies 30+ quality, performance, and best-practice checks

✓ Evaluates data models, scripts, and expressions

## PERFORMANCE INSIGHT

✓ Gain clear visibility into inefficiencies

✓ Obtain and apply actionable recommendations

✓ Reduce time spent understanding complex apps

## APP RELIABILITY

✓ Higher quality, more reliable Qlik apps

✓ Less rework, troubleshooting, and technical debt

✓ Improved testing across analytics teams
